

客观知识)。二、④句实为取信过程的总结:历经“科学界层层审视、受诸多外在因素影响”的取信过程后,“个体不成熟的发现声明”完美蜕变为“集体成熟的可信发现”。

· 真题精解 ·

33. Paragraph 3 shows that a discovery claim becomes credible after it _____.	33. 第三段表明,“发现声明”在_____之后变得可信。
[A] has attracted the attention of the general public	[A] 吸引普通大众注意力
[B] has been examined by the scientific community	[B] 被科学界检验
[C] has received recognition from editors and reviewers	[C] 获得编辑和评论家认同
[D] has been frequently quoted by peer scientists	[D] 被科学家同行经常性引用

[精准定位] 第三段④句明确指出了“发现声明”在历经“‘涉及科学界层层审视、受到多种外界因素影响’的取信过程”之后的蜕变:由个体的发现声明转变成了集体可信的发现。可见,发现声明要接受科学界的检验后方可信,所以,[B]为正确答案。

[命题解密] [B]对应④句 works its way through the community,是对第三段③④句内容的最有力概括。
[A]将③句第四个分句所述结果“发现声明被大众、被科学界认可”偷换为条件。
[C]将③句第二个分句所述取信过程中的一环“编辑、评论家扮演看门人角色”偷换为全过程各环节。
[D]把③句中第三个分句中 other scientists use the new findings... 偷换为 frequently quoted by... ;而且,“其他科学家使用该发现”也只是“取信过程”中的一环。

[技巧总结] 本题形似考查“时间先后”,实则考查“前提条件”。“条件题”干扰项通常如下设置:①将结果偷换为条件;②将条件之一当作充分条件,对此可借助“比对选项内容”来甄别,通常涉及“选项包含——即某选项较全面且涵盖其他选项所涉及的点”,该项正确的可能性较大。本题中[C]和[D]涉及的人物事件其实被[B]包含,即, editors and reviewers、peer scientists 均属于 the scientific community; received recognition、frequently quoted 可算作 examined 的不同表现形式,再结合上题“取信过程需要集体努力”,初步判断[B]可能正确,再结合原文进一步发现[A]将结果偷换为条件,故而敲定[B]正确。

IV ① Two paradoxes^① exist throughout this credibility process. ② First, scientific work tends to focus on some aspect of prevailing knowledge that is viewed as incomplete or incorrect. ③ Little reward accompanies duplication^② and confirmation of what is already known and believed. ④ The goal is new-search, not re-search. ⑤ Not surprisingly, newly published discovery claims and credible discoveries that appear to be important and convincing will always be open to challenge and potential modification^③ or refutation^④ by future researchers. ⑥ Second, novelty^⑤ itself frequently provokes disbelief. ⑦^⑥ Nobel Laureate and physiologist^⑥ Albert Szent-Györgyi once described discovery as “seeing what everybody has seen and thinking what nobody has thought.” ⑧ But thinking what nobody else has thought and telling others what they have missed may not change their views. ⑨ Sometimes years are required for truly novel discovery claims to be accepted and appreciated.

整个“取信过程”中存在着两种矛盾情况。第一,科学研究工作倾向于关注流行知识中被认为不完整或不正确的方面。重复并确认已经为人所知以及可信的知识几乎不会带来回报。科学研究的目标是新研究而不是重复研究。(如此一来,)貌似重要且令人信服的新发表的发现声明和可信发现总是面对后来研究者的质疑、修改、甚至推翻,便不足为奇了。第二,新奇事物本身就容易招致怀疑。诺贝尔奖获得者、生理学家 Albert Szent-Gyorgyi 曾经将发现描述为“见世人所见,思无人所想”。但“思考他人未想”并“告知他人所疏漏”未必会改变这些人的看法。真正新颖的发现声明有时需要很多年才能被接受和认可。
