

and is part of *Science's* overall drive to increase reproducibility in the research we publish.”

结构切分：

句子主干：

McNutt	said:
主语	谓语

 ← Asked whether any particular papers had impelled the change, 伴随状语

宾语从句↑

“The creation of the ‘statistics board’		was motivated by concerns		broadly with the application	
主语		谓语1			
of statistics and data analysis in scientific research		and		is part of <i>Science's</i> overall drive	
介词短语做后置定语修饰concerns		连词		谓语2	
to increase reproducibility in the research we publish.”					
不定式做定语修饰drive					

功能注释：主干为 McNutt said...，引出对问题的回答；Asked whether... 为过去分词做伴随状语，说明问题的内容。said 引出宾语从句 The creation... was motivated by concerns... and is part of *Science's* overall drive...；其中，broadly with the application of... 说明 concerns 的内容；to increase... 后置定语，说明 drive(努力)的内容；we publish 为省略了 that 的定语从句，修饰 research。

• 语篇分析 •

第三段具体论述新举措的动因：不是因为个别问题论文，而是出于大局考虑。关键词为：①concerns；②to increase reproducibility。

本段是由包含“一问一答”的独句构成。Asked whether... 展示问题：新举措出台是否源于某些(存在问题的)论文？其中 impel(促使, 驱使)为隐性因果逻辑词, any particular papers(专指的论文)暗指“发表在《科学》上的存在数据错误的论文”, the change 指代“成立 SBoRE”这一改革措施。McNutt said... 引出回答：一是因为科研中的统计和数据分析受到广泛关切, 二是为了提升已发表研究的可复制性。The creation of the ‘statistics board’ 呼应 the change, 同指新举措“创立 SBoRE”；was motivated by... and is part of... 呼应 had impelled, 引出实施新举措的两重原因。诱因一 concerns broadly with... (broadly 为泛指)与问话中的 any particular papers(particular 为专指)对立, 表明新举措并非基于个别问题论文, 而是从大局出发改善科研中日益普遍的数据问题。诱因二 is part of *Science's* overall drive to... 中, overall drive (drive 意为“[尤指为某一目的有组织的]努力”)凸显《科学》意欲改革的力度和决心；to increase reproducibility in... 明确“努力”的方向, 反向呼应首段的 the irreproducibility of...。

【深层解读】本段为首段②句所述新举措原因的阐述：借助因果逻辑近义表达 (impelled、was motivated by、is part of... overall drive 等)复现首段 after 以及 concerns broadly with... data analysis... 复现首段 widespread concern... data analysis...，明确本段与首段②句间阐释关联：成立 SBoRE 小组的动因不是基于个别有问题的论文, 而是出于大局考虑。到此可总结出前三段逻辑关系：首段概述“举措、原因”，第二、三段围绕首段两点分别展开说明。

IV ① Giovanni Parmigiani, a biostatistician at the Harvard School of Public Health, a member of the SBoRE group, says he expects the board to “play primarily^① an advisory^② role.” ② He agreed to join because he “found the foresight^③ behind the establishment of the SBoRE to be novel, unique and likely to have a lasting impact. ③ This impact will not only be through the publications in *Science* itself, but hopefully through a larger group of publishing places that may want to model^④ their approach^⑤ after *Science*.”

哈佛大学公共卫生学院的生物统计学家、SBoRE 成员乔瓦尼·帕马强尼说，他期望该委员会“主要发挥某种咨询作用”。他同意加入委员会是因为他“发现 SBoRE 创立背后的远见新颖、独特的，而且很可能会产生一种持久的影响。这种影响将不仅仅会遍及《科学》自己发表的文章，也有望波及一大批可能想效法《科学》此举的出版单位。”
